Experience

SAP Labs, Bulgaria

DECEMBER 2024 - PRESENT

UX Design Consultant

- Owning end-to-end design process for Order-to-Cash applications, simplifying multi-role financial workflows
- Designing Agentic AI interfaces, with a focus on system transparency, explainability, and human-in-the-loop control
- Planning and conducting user research, translating findings into meaningful insights, user journey maps, and experience improvements
- Creating low-/high-fidelity flows, and interactive prototypes aligned with SAP Design System
- Collaborating cross-functionally with product managers, architects, developers, and UX researchers to deliver data-informed and optimised solutions
- Presenting concepts, feedback and deliverables to the stakeholders
- Contributing to team's operational initiatives that improve UX efficiency, visibility, and process optimisation within the organisation

CIRCL Technologies Ltd., Malta

OCTOBER 2022 - JULY 2024

Product Designer

- Collaborated in the end-to-end product design lifecycle for SaaS Android mobile application and desktop back-office platform (from research and ideation to validated prototypes and development handoff)
- Leveraged competitive benchmarks, user research, and iterative usability testing to reduce friction and drive data-informed decisions
- Revamped and scaled the design system
- Translated business requirements into intuitive user flows, wireframes, and interactive prototypes
- Structured and facilitated cross-team meetings to refine requirements, designs and possible solutions
- Conducted usability testing and iterative validation cycles
- Partnered closely with engineers to ensure technical feasibility and smooth implementation
- Supported product adoption and onboarding by creating training and marketing materials

BNP Paribas Bank, Poland

APRIL 2022 - SEPTEMBER 2022

User Experience & Design System Expert

- Designed and refined core mobile banking user journeys for GOmobile (iOS & Android) in an Agile/Scrum environment, serving a large-scale retail user base
- Maintained and evolved a scalable design system, aligned with brand identity and WCAG accessibility standards
- Conducted user testing and competitor analysis to identify usability gaps and optimization opportunities
- Collaborated with multiple development teams to ensure consistent implementation across the application
- Translated research insights into actionable UI improvements and documented design standards

Capgemini, Poland

DECEMBER 2020 - MARCH 2022

Junior Product Designer

- Contributed to organization's internal web and SaaS tools, participating in every stage of the design process
- Created user flows, wireframes, and interactive prototypes based on stakeholder goals and user need
- Conducted usability and accessibility audits to improve product performance and inclusivity
- Designed UI aligned with brand guidelines and UX standards
- Worked cross-functionally with product owners and developers in an agile environment

Junior Graphic Designer

- Designed print and digital assets (newsletters, presentations, branding materials)
- Developed materials aligned with corporate visual identity systems (Capgemini and Odigo)

About me

Product Designer operating at a senior level, with experience across enterprise, SaaS, and mobile products, turning complex workflows and ambiguous problem spaces into clear user experience. Skilled in end-to-end product design, scalable design systems, and Agentic AI interfaces.
