

Dominika Spinda

Expirence

SAP Labs, Bulgaria

DECEMBER 2024 - PRESENT

UX Design Consultant

- Leading end-to-end design process for the assigned internal Order to Cash applications
- Working on business strategic and AI-driven projects
- Facilitating discovery workshops with the stakeholders
- Planning and conducting user research, translating findings into meaningful insights, user journey maps, and experience improvements
- Designing low-/high-fidelity wireframes, and interactive Figma prototypes aligned with SAP Design System
- Collaborating cross-functionally with product managers, architects, developers, and UX researchers to deliver data-informed and optimised solutions
- Presenting concepts, research outcomes and deliverables to the stakeholders
- Contributing to and establishing team's operational initiatives that improve efficiency, visibility, and process optimisation within the organisation

CIRCL Technologies Ltd., Malta

OCTOBER 2022 - JULY 2024

Product Designer

- Collaborating in the end-to-end product design lifecycle for SaaS mobile Android application and desktop back-office platform (from research and ideation to validated prototypes and development handoff)
- Researched industry benchmarks, competitors, and user behaviour to drive data-informed design decisions
- Structured and facilitated cross-team meetings to refine requirements, designs and possible solutions
- Translated business objectives into intuitive user flows, wireframes, and interactive prototypes
- Conducted usability testing and iterative validation cycles
- Revamped and scaled the design system, ensuring consistency and alignment with industry standards
- Partnered closely with engineers to ensure technical feasibility and smooth implementation
- Created marketing and training materials to support product adoption and user engagement

BNP Paribas Bank, Poland

APRIL 2022 - SEPTEMBER 2022

User Experience & Design System Expert

- Designed and refined UX for GOMobile (iOS & Android) within an Agile/Scrum methodology
- Maintained and evolved a scalable design system, aligned with brand identity and accessibility standards
- Conducted user testing and competitor analysis to identify usability gaps and optimization opportunities
- Collaborated with multiple development teams to ensure consistent implementation across the application
- Translated research insights into actionable UI improvements and documented design standards

Capgemini, Poland

DECEMBER 2020 - MARCH 2022

Junior Product Designer

- Contributed to organization's internal web and SaaS tools, participating in every stage of the design process
- Created user flows, wireframes, and interactive prototypes based on stakeholder goals and user need
- Conducted usability and accessibility audits to improve product performance and inclusivity
- Designed UI aligned with brand guidelines and UX standards
- Worked cross-functionally with product owners and developers in an agile environment

Junior Graphic Designer

- Designed print and digital assets (newsletters, presentations, branding materials)
- Developed materials aligned with corporate visual identity systems (Capgemini and Odigo)

About me

I am a curious problem solver, with quick understanding and passion to create valuable and strategic products.

Constantly seeking of new learning opportunities and self-improvement.
